Exp1

Q.1. Write a program to display hello world.

Q.2. Write a program to add 2 16-bit numbers.

Exp2

Q.1. Write a program to copy 10 words (16-bit numbers) from memory location 1000:0000 to 1000:2000.

Q.2. Write a program to copy 10 words (16-bit numbers) from memory location 1000:0000 to 2000:0000.

Exp3

Q.1. Write a program to find the length of the string.

Q.2. Write a program to check whether two strings are equal or not.

Exp4

Q. Implement Boothe's algorithm in C/C++/Java.

Exp5

Q.1. Implementation of division using Restoring Algorithm in any language (C/C++/Java).

Q.2. Implementation of division using Non Restoring Algorithm in any language (C/C++/Java).

Exp8

Q. Compute a Block Index (BI) and Cache Index (CI) for any Memory Configuration, match BI, CI and Identify which block in main memory can be mapped to which line in cache memory using tag bits.
